**Subject:** Firebase IID to A... - [REDACTED]@google.com Hi Steve, These ...

Dan Stone replied to a comment in the following document

Firebase IID to Analytics PWG Analysis (go/pwg-ga-iid)

Some of the examples of this joinability risks Create the ability to link app events collected by GA4F to GAIA ID even if end users turn off WAA and developers/customers disable Data Sharing. Break user expectations, MyActivity controls and transparency. Subpoena: Having to retrieve Android AdId data, app\_instance\_id data given a GAIA ID for users turning off WAA.

Hi Steve,

These are the best I can come up with to explain by short sentences.

New

Thanks so much, Xinyu. Can we update this to clarify that this is really expanding the ability, not creating it?

Also, can you please explain the user expectations? This data would not show up in MyActivity and is not actually joined to GAIA, so not sure how this would break their expectations.
